"AGRICULTURE IN THE CANADIAN
"NORTHWEST CAN NO LONGER
"BE REGARDED BY ANYBODY AS
"AN EXPERIMENT; IT IS AN
"ESTABLISHED AND PROFITABLE
"FACT."—SIR WILLIAM VAN HORNE.

WILLIAM VAN HORNE & CO

Introduction.

The statements and letters herein reproduced are not specially selected.

Information of a similar nature has been received from those whose names appear in the index, and copies of these may be had on application. All that is aimed at by the Board is to reproduce the facts as they have been furnished, in order that those seeking homes in the West may have reliable information from the settlers themselves.

What's in it?

Letters and Statements from your friends. Examine these, as well as the index, to see if you recognize any of the names. Then if you desire further information it will be supplied to you on application.

The following circular letter shews

HOW THIS INFORMATION HAS BEEN OBTAINED.

"DEAR SIR :

"For the information of this Association, I should be much obliged if you would return to me the enclosed list of questions as fully answered as your knowledge or inclination will permit.

"It is considered most desirable to get the testimony of as many as possible of the successful residents in the country as to their actual circumstances and conditions, in order that intending immigrants may be furnished with information and advice of the most reliable character. In assisting to promote this object I venture to hope you will not consider it too much trouble to answer the questions enclosed, especially as you will readily understand how difficult it is without such assistance to get reliable data to work upon.

"If you can possibly spare the time to write me a special letter, giving me your views upon any point, I should esteem it a great favor.

"There is a large variety of subjects to be touched upon, but the matter of free land is, to my mind, one of the most important."

WHY IT WAS OBTAINED.

To establish a medium through which homeseekers may obtain authentic information as to the condition of those already settled in Canada; and to enable them to decide where it is desirable to secure homes for themselves.

IF INFORMATION IS REQUIRED

Fill in a form following the one given on the next page, stating your circumstances freely. We can then advise you what is best to do, and will furnish you full particulars as to routes, cost of transportation, etc., etc.

Your Name.....

Address

Married or Single.....

Number and ages of family.....

Amount of capital, \$.....

Occupation

Number of friends in your neighborhood likely to come with
you

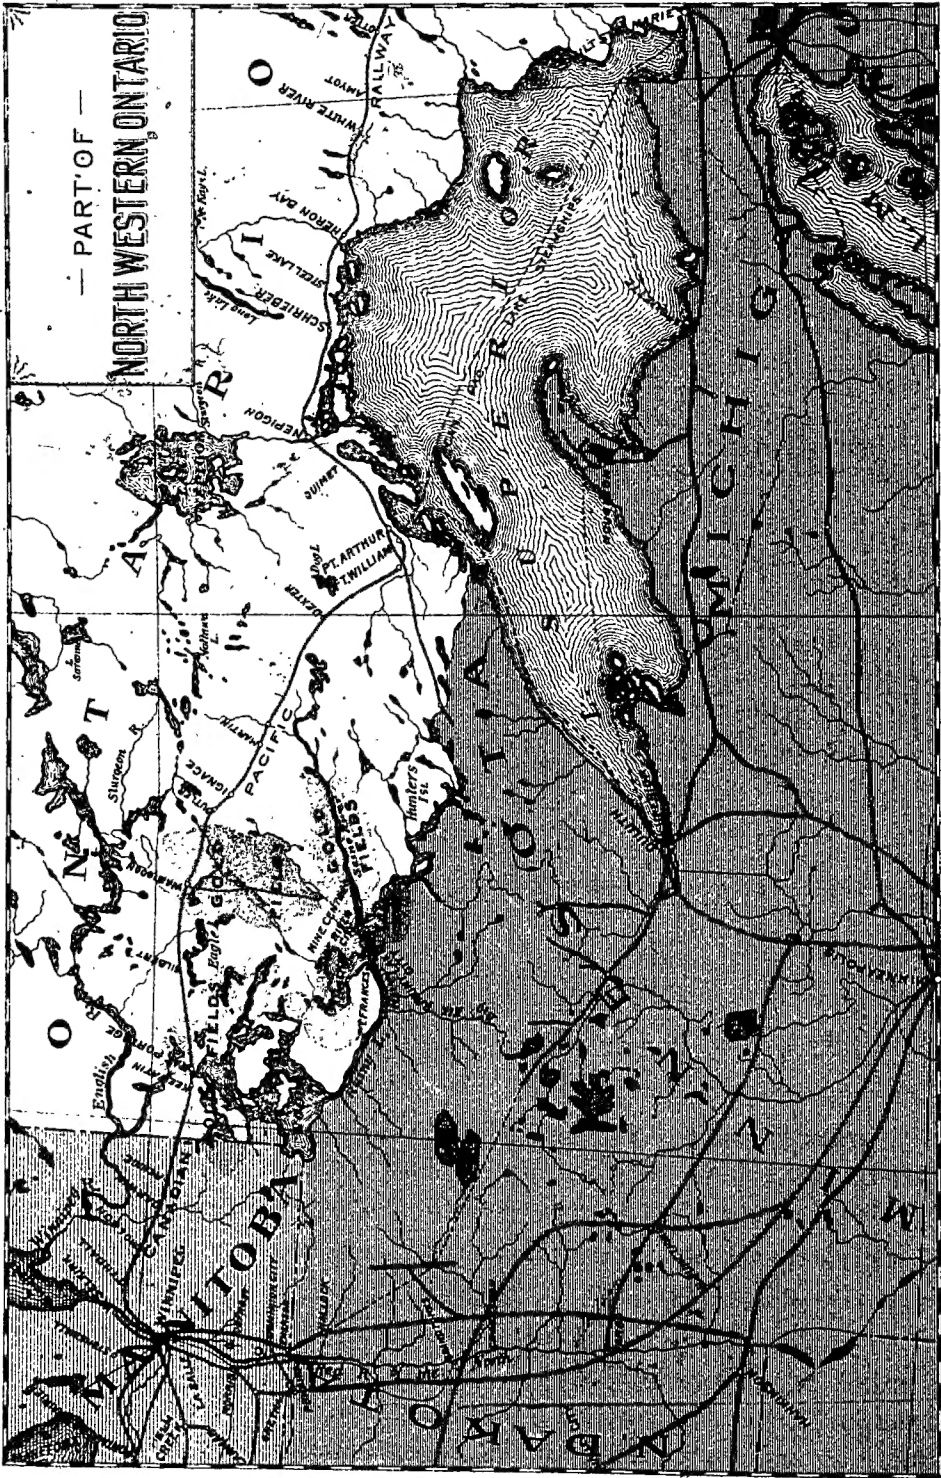

Do you want a free homestead or to buy or rent?.....

**Employment for Farm Laborers and House Servants
will be sought for all** who are suitable for such employment.
Reliable information on all subjects will be sent on application.

It is no trouble to us to answer letters, so do not hesitate
about asking questions.

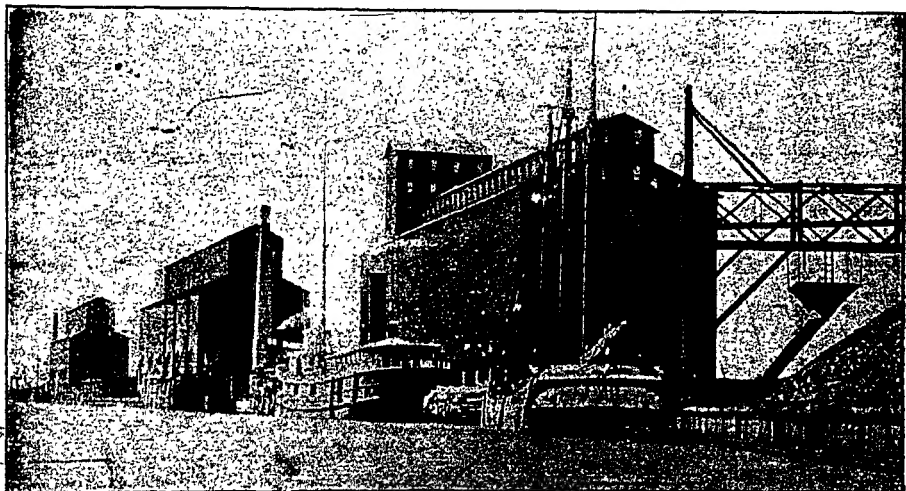

Probably your friends' names may not be amongst those
in index, as we have only been able to gather and print a portion
of our information as yet, but if you will send a list of any such
names, an endeavor will at once be made to locate their address,
and place you in communication with them.

— PART OF —
NORTH WESTERN ONTARIO

Revised Edition 1916

ST. PAUL

ELEVATORS, FORT WILLIAM, ONTARIO.

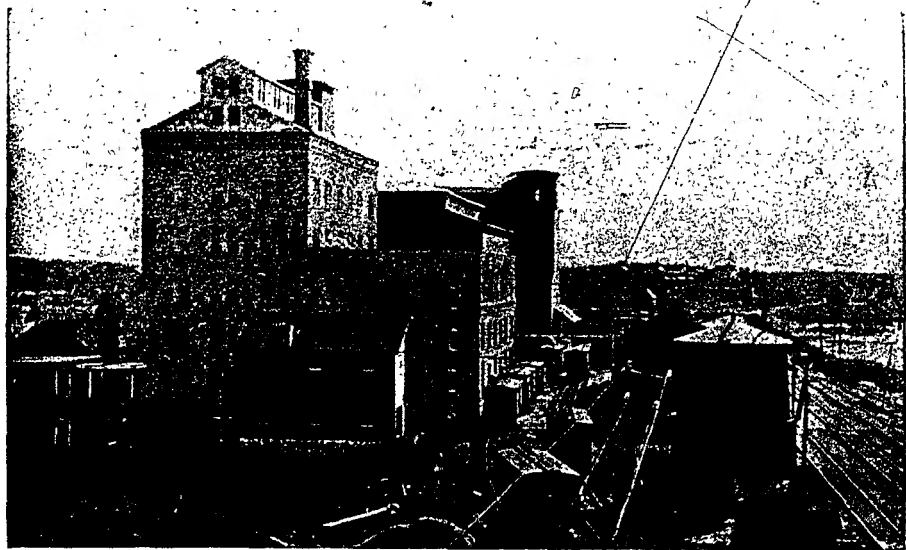

North Western Ontario.

This district lying between Lake Superior and Manitoba is almost wholly a mining country, but in some parts, especially in the Rainy River District, considerable areas of excellent farm lands are to be found.

The mineral resources of this district, are now becoming widely known.

A large number of mines are in process of development, and it is difficult to form any estimate of the wealth of this region.

The district is a network of lakes, rivers and streams. Access to any part is therefore easy, and the cost of transportation is thus reduced to a minimum.

EXHIBITION GROUNDS, WINNIPEG.

Manitoba.

The Province of Manitoba is situated in the centre of the continent, being midway between the Atlantic and Pacific Oceans. It comprises within its boundaries the celebrated valleys of the Red and Assiniboine Rivers, well known as the greatest grain producing areas on the continent.

The settlement of the Province dates practically from the year 1880.

During the sixteen years that have since elapsed the railway system of the Province has come into existence, and now comprises nearly 1600 miles of railway. In examining the returns hereinafter set forth, it must be borne in mind that these wonderful results have been produced by less than 25,000 farmers.

MR. MARTIN'S FARM, PEMBINA VALLEY, MAN.

GRAIN.

The following tables give a summary of the actual yields of the various crops of the Province the last three years 1894, 1895 and 1896, from statistics collected by the Provincial Government :—

1894			
GRAIN.	AREA IN CROP.	YIELD PER ACRE IN BUSHELS.	TOTAL YIELD IN BUSHELS.
Wheat.....	1,010,186	17.	17,172,888.

Turnips, etc.....	6,715	282	1,898,805
Total.....			<u>3,861,295</u>

DAIRY.

That dairying in Manitoba can be made a thorough success is proven by the fact, that the butter manufactured in the creameries last year, both in the Eastern and English markets, was acknowledged to be of excellent quality, and reports sent to the Dairy Superintendent from exporters in Montreal, go to show that the butter was equal, and in some cases superior, to any that was manufactured in the Dominion of Canada. Both the Local and Dominion Governments have shown a desire to do all in their power to promote improvements in Dairy work.

The Local Government has amended an act to permit loans, up to \$500.00 each, being made to cheese factories and creameries, and in this way no less a sum than \$8,624.25 has been advanced by the Government.

A well qualified dairy superintendent has been engaged to give practical supervision and advice to the various factory workers; a well-appointed Dairy School has been started in Winnipeg, where local managers of cheese factories and creameries, and others in the Province may spend a month or more each year, under the skilled supervision of the superintendent in further perfecting themselves in butter and cheese making.

According to the report of the Department of Agriculture and Immigration for the year ending 1895, there are fifty-two cheese factories now in Manitoba, which show from carefully compiled figures an output for the year of 1,553,192 pounds of cheese, which sold at an average price of 6.9-10c per pound, realizing a total of \$107,170.25.

There are nineteen creameries from which the output has been 529,812 pounds of butter, which sold at an average price of 16 1-8c per pound, or a total of \$85,652.94, making a grand total of \$192,823.19 from cheese factories and creameries.

From answers of correspondents the amount of dairy butter disposed of by farmers, during last year (1896) is placed at 1,469,025 pounds; the average price realized for same was 11 2-3c per pound.

The amount of creamery butter produced (although returns are not completed) is placed at 776,000 pounds.

Total butter product of the Province 2,245,025 pounds.

Returns from cheese factories are not yet completed.

TABLE SHOWING RESULT OF DAIRY TEST.

AT THE WINNIPEG INDUSTRIAL EXHIBITION ON THURSDAY, 18TH JULY, 1895, UNDER THE FOLLOWING CONDITIONS:—
"Class 24—Special by the Pure Bred Cattle Breeders' Association of Manitoba and North-West Territories."

"The following rules to govern:—
 "Competition is open to cows, any age, any pure breed; certificates of registration in recognised herd book to be produced when called for.
 "months and days from birth to date of last calving, and number of days from last calving to date of test, to be furnished when making entry. The test to take place on Thursday of the show week, the Judge, or such person as he may name, to see that each cow is properly milked at 6 o'clock, p.m., on Wednesday. Exhibitors to feed, water and care for their own stock as they see fit. The Judge, or such person as he may name, to see the cows milked, and each cow's milk weighed. The percentage of butter fat to be ascertained by the Babcock tester. The award to be made in favor of the cow producing the greatest amount of estimated commercial butter, 80 per cent. butter fat."

CORNER CATTLE YARDS, WINNIPEG.

STOCK.

The export of fat cattle and hogs, which, until the year 1894, was a very small quantity, is now a valuable and marked feature of the trade of the Province, and farmers are beginning to pay more attention to raising the same.

The following is a copy of reports issued by the Department of Agriculture and Immigration for the years 1895 and 1896.

1895.

The output of live stock for the year ;—

Cattle.....	22,000 head.
Hogs.....	10,000 "

This shows an increase in cattle exported of 100 % over that of 1894, and 25 % increase in the number of hogs exported. The average price received for beef cattle on foot was 3c. per pound ; hogs, 4c. per pound.

STOCK IN PROVINCE.

From statistics of last revised assessment sent in by the Clerks of the various municipalities in the Province, the following statement is compiled :

Number of Horses in the Province.....	91,194
" Cattle " "	192,525
" Sheep " "	35,766
" Pigs " "	57,457

A HERD OF HEREFORDS.

POULTRY.

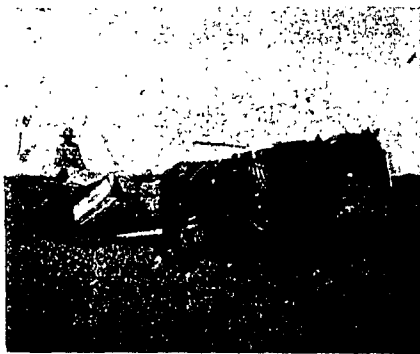

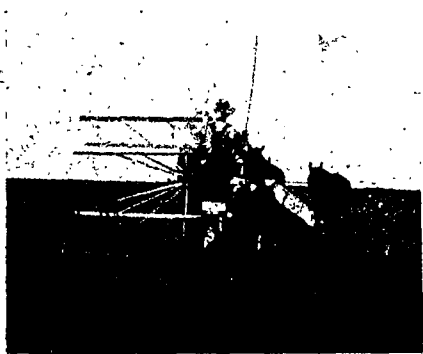

From carefully compiled statistics it is estimated that the poultry disposed of by the farmers was as follows :

Turkeys.....	36,975
Geese.....	13,545
Chickens.....	167,665

1896.

Beef Cattle.—The number of beef cattle exported from Manitoba this season was 13,833.

Hogs.—The number of hogs shipped out of the Province on foot was 3,834. The number received by Winnipeg packers and butchers 22,000. Total 25,834.

BINDERS AT WORK, MANITOBA.

FARM SCENE NEAR WINNIPEG.

FARM HOUSE, BELMONT, MAN.

POULTRY DISPOSED OF BY FARMERS.

Turkeys	43,065
Geese	13,810
Chickens	169,580

This quantity is not sufficient for home consumption, and British Columbia and other western localities which should be our markets are being supplied from Ontario.

STOCK IN PROVINCE.

From statistics of last revised assessment sent in by the clerks of the various municipalities in the province the following statement is compiled :

Number of Horses in the Province.....	95,140
“ Cattle “ “	210,507
“ Sheep “ “	33,812
“ Pigs “ “	72,562

As an illustration of what it is possible to do in general farming, the following figures are given regarding a small portion of the Province that gives special attention to mixed farming :

Shipped to Winnipeg from points on the M. & N. W. Ry.

Cattle	8,287
Hogs	3,483
Butter (lbs.)	791,510
Cheese (lbs.)	92,480

RAILWAYS.

The following is a list of the railways in the province, and the mileage of each under operation :

Canadian Pacific Railway.....	Miles.
Main Line	309'0
Branches—	
Emerson to Winnipeg Junction.....	64'5

Crop (1886).....	4,000,000 bushels
“ (1895).....	29,000,000 “
“ (1896) Estimated.....	14,500,000 “

PRICES OF FARM LANDS.

Choice wild lands are for sale from \$3.00 to \$10.00 per acre. Improved Farms from \$5.00 to \$20.00. Homesteads or Free Lands are still to be obtained in some localities. Many home-seekers prefer to rent for the first year or two before purchasing. Farms can be rented in any part of the Province on liberal terms for cash, or on shares.

**MAP OF
SOUTHERN PORTION OF
NORTH WEST TERRITORIES**

VIEW NEAR FORT QU'APPELLE.

Assiniboia.

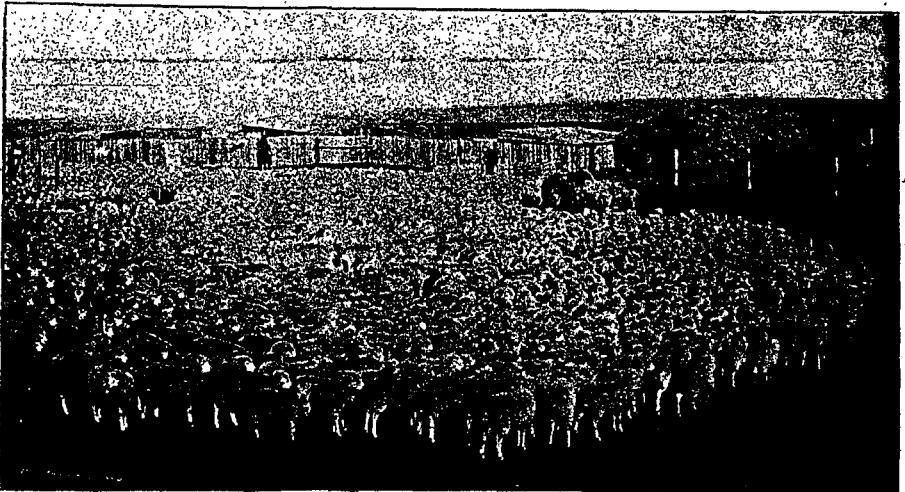

Eastern Assiniboia is a park-like country, being generally rolling prairie. The low lands produce great quantities of heavy luxuriant grasses.

This district and Manitoba will in the near future undoubtedly be the greatest wheat producing area of the American continent.

The soil is a rich black vegetable mould from twelve to eighteen inches deep, easy to work and exceedingly productive.

The western part of the district is particularly well adapted to stock raising.

A good growth of nutritious grasses is to be found everywhere, the main variety of which, is known as "Buffalo Grass" of a short crisp growth. The grass appears to become dry about midsummer, but is still green and growing at the roots, and both in winter and summer furnishes the best of pasturage.

LAMBS ON RANCH, GULL LAKE, N.W.T.

Saskatchewan.

Saskatchewan, lying to the north of Assiniboia, is the largest of the provisional districts.

Its area is 106,700 square miles.

This part of the country is also well adapted for stock-raising, and grain growing.

In winter cattle and sheep should be fed, and sheltered from three to four months. But horses can be kept in large bands, and winter out well.

All requirements for successful dairy farming, can be found in any portion of this district.

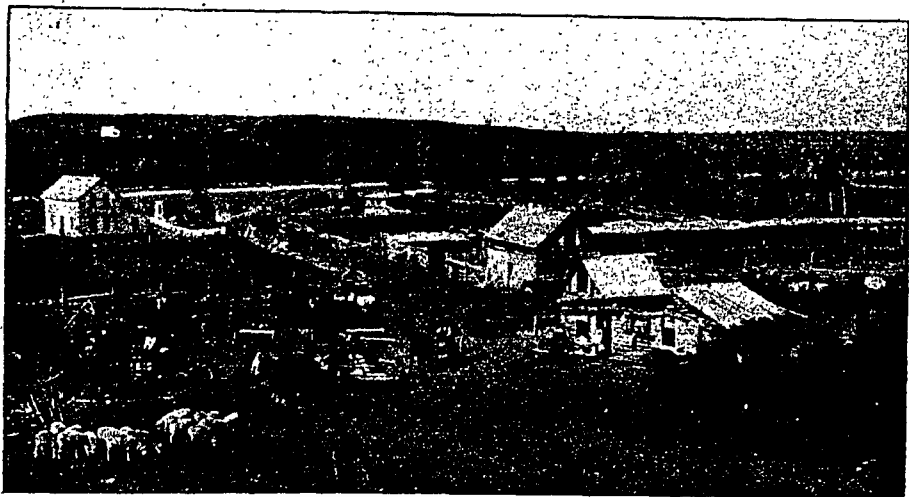

Wild fruits of nearly every variety grow in profusion, strawberry, raspberry, gooseberry, blueberry, cranberry, black currants, etc., are to be found every where.

ALBERTA SIRES.

Alberta.

This district comprises an area of about 106,000 square miles, and is bounded on the east by Assiniboia and Saskatchewan; on the west by the Province of British Columbia. The western portion of the district, which comprises the eastern ranges of the Rocky Mountains is characterized by scenery of great grandeur. Many ranches are found in Southern Alberta in a flourishing and prosperous condition, and the export of cattle, horses and sheep from this district has assumed large proportions. The northern portion of this district is eminently fitted for Dairying purposes, and generally for mixed farming. The district is rich in coal, and great supplies of timber are to be found. Native fruits of all kinds are found in profusion in almost every part of this great district.

STOCK FARM, FORT SASKATCHEWAN, ALBERTA.

British Columbia.

The Province of British Columbia is the most westerly of the Canadian Provinces, being bounded on the west by the Pacific Ocean, and on the east by the District of Alberta. This Province extends about 700 miles north and south, and comprises within its boundaries over 380,000 square miles.

The area of arable land in the Province is small, but in the valleys of the great rivers many thousands of square miles are found suited to the production of every kind of grain and fruit known to the temperate climates.

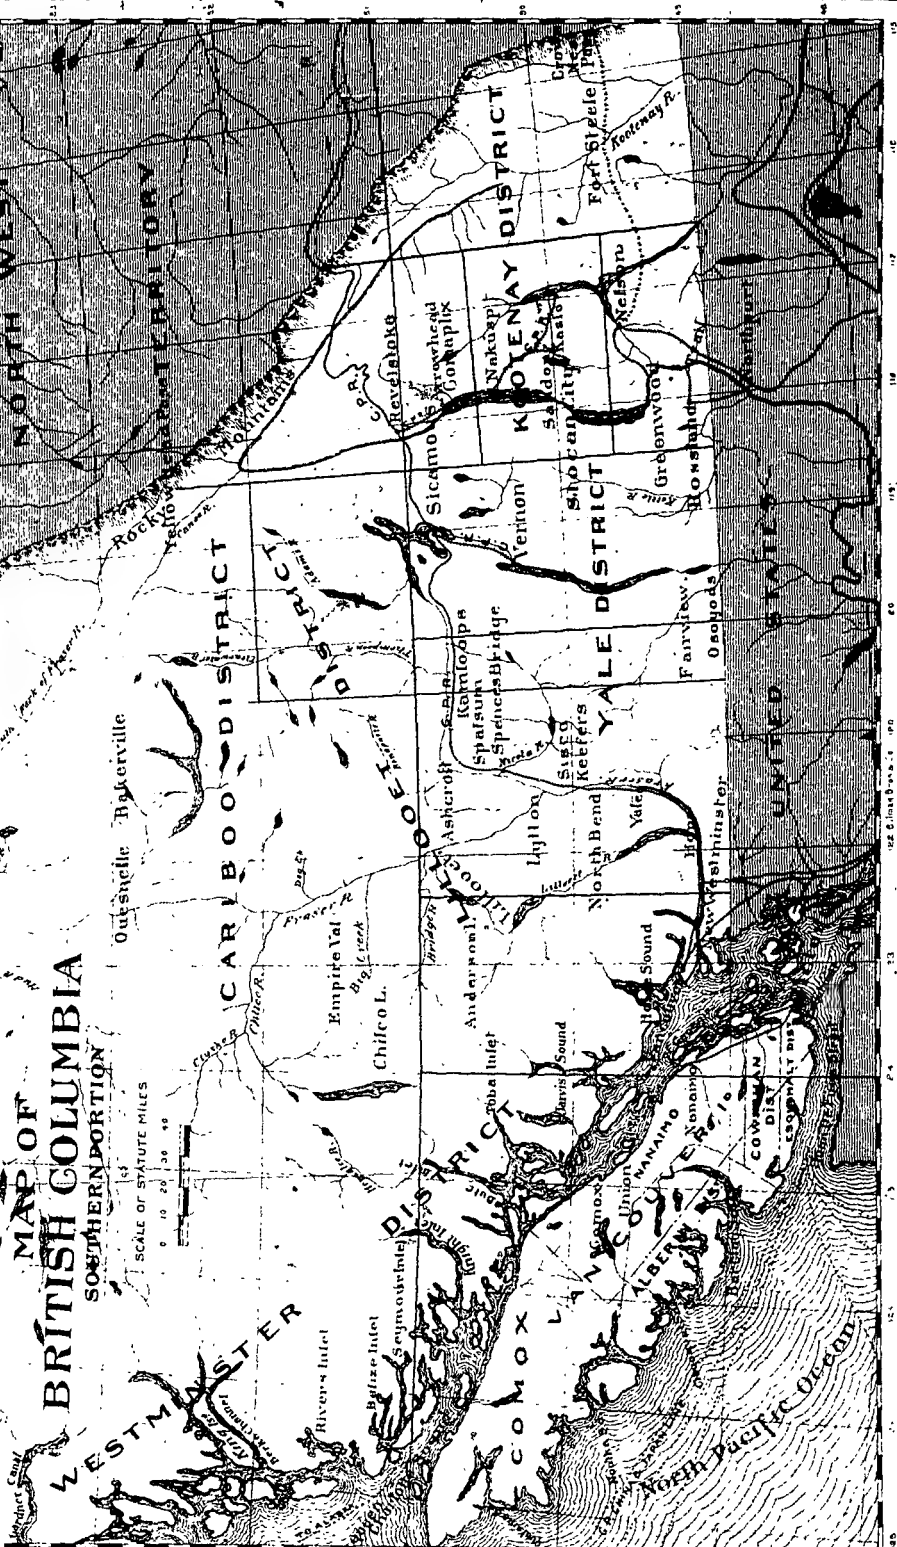

In mineral resources British Columbia is probably one of the richest in the world. Coal abounds, and gold, silver, iron, copper, galena, mercury, platinum, plumbago, mica, etc., are found in almost every part. The recent enormous increase in mining activity is but a slight indication of what may be expected when the different mining districts become more fully developed.

TRAIL CREEK, B.C., SHOWING SMELTER.

MAP OF BRITISH COLUMBIA SOUTHERN PORTION

SCALE OF STATUTE MILES
0 10 20 30 40

SMLTER, PILOT BAY, BRITISH COLUMBIA.

As showing the value of the coal produced, The Vancouver Island Coal output in 1895 was 939,954 tons. The value of the output of minerals other than coal increased from \$1,241,031 in 1894, to approximately \$5,000,000 in the year 1895.

The fisheries of British Columbia are probably the richest in the world, Although only two million dollars is invested in them, the exports for the fiscal year ending June 20, 1895, amounted to \$3,264,500.

There were 47 salmon canneries in operation, and the total product was 566,395 cases, valued at \$2,831,875.00.

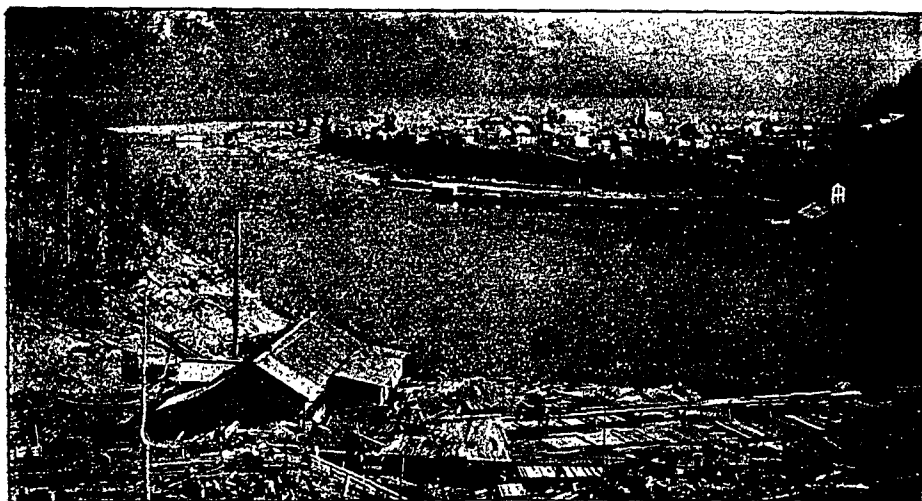

The export of fresh salmon frozen and packed in ice, amounted to one million and a quarter pounds.

The catch of 64 schooners engaged in sealing in 1895, was 70,739 skins.

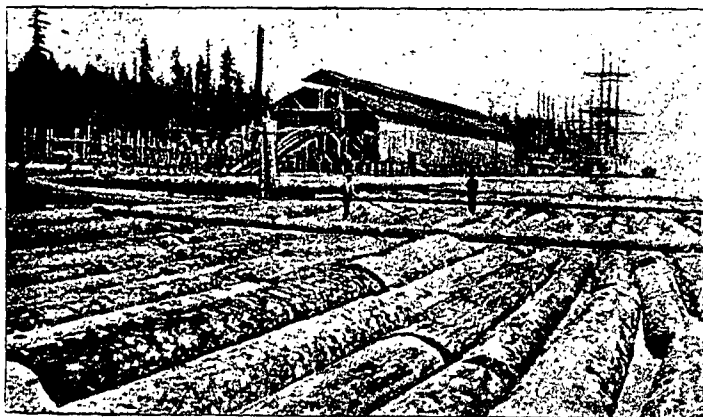

LUMBER.—A steady improvement is noticed yearly in the lumber industry. During the year 1895 the quantity cut amounted to 112,884,640 feet, of which 52,043,670 feet valued at \$471,400, was exported to eleven different countries.

SALMON CATCH, BRITISH COLUMBIA.

KASLO, BRITISH COLUMBIA.

LUMBER FOR EXPORT, BRITISH COLUMBIA.

VIEW NELSON BRITISH COLUMBIA.

FROM CAREFULLY COMPILED STATISTICS FOR THE YEAR 1896, IT IS ESTIMATED THAT THE PRODUCTS OF THE PROVINCE OF MANITOBA YIELDED FOR THAT YEAR A GRAND TOTAL OF EIGHTEEN MILLION OF DOLLARS. WHEN IT IS CONSIDERED THAT THERE ARE BUT 25,000 FARMERS IN THE PROVINCE, IT WILL AT ONCE BE APPARENT THAT THIS IS A COUNTRY WHERE FARMING PAYS.

Name the several nationalities in your township? Canadian & Scotch

What is the predominating nationality? Canadian

When did you settle in your present location? May 1883

Have you been successful? yes

Would you object to stating what capital or outfit you started with?

My brother and myself started with a
yoke of Oxen and a halting plow. This was
our complete outfit when we started.

How much land have you under cultivation in -

Wheat 150
Oats 40
Barley —
Other Grain —

Number of—

Horses 10
Cattle 30
Swine 2
Sheep —
Poultry 50

Value of—

House \$500.00
Stable 200.00
Implements 800.00

This is the original cost of
implements all are in good
condition at present and does
not include anything worn out.

Would you recommend your friends to come to this country? yes, if they have capital

If so, what time of year?

Spring time

What articles should they bring with them?

This is a hard question to answer
as some Ontario implements are no use here and others are.
I would certainly advise bringing household goods, and also machinery
such as Reapers, binders, harrows, etc. If a farmer would move in here, he would
only get a few things for himself and it will pay to bring anything out here that a man
can afford to bring.

And what leave behind?

Horses and cattle as they can
be bought as cheap here, except Thoroughbreds. I would
advise a way to bring any Thoroughbred stock with him—

What class of farming is the most successful in your district?

Mixed farming

What is the average price for an improved farm?

Cannot say as there are
no farms exchanging hands here.

What is the average price for wild land?

From 3.00 to 5.00 per acre
wild purchase timberland land.

What is the usual time for commencing farming operations in the Spring?

Second week in April

Dear sir

I have answered
your list of questions the best
I could. I might say I am
well satisfied with the country
and I think it is just the place
for emigrants to come to if they
are willing to work. there is
nothing to hinder them from
getting along and being
independant in very few years.
a man coming to the country
with some money can start
quicker, but he can get a start
without it as there is always
work to be got.

Yours Truly

Peter D. Stewart

Cardston

Dec 30/96

J. W. Henbuck Esq

Dear Sir,

By your request I write you a few lines and will give you my experience

the four years and half that I have been in this country. I brought 24 head of cattle with me from the U.S. of America and people told me to let them run on the range they would not go away so I did so and the first storm that came the cattle drove with the storm and I recovered eight

(2)
of them again. Several other people experienced the same thing, so we find it is necessary for people to look well after their stock in regard to settling of this part of the country it is excellent for raising all kinds of grain and vegetables, wheat will average 25 to 30 bushels per Acre and in some cases more, I raised 60 bushels of oats per Acre this year, very good crops of potatoes this year, a good deal of wheat was frost-killed owing to early frosts and storms, so we are beginning to put in fall wheat and it ripens before the frost sets in, and then for spring grain it is best to do all ploughing in the fall.

(3)

if possible, and then you have the land ready as soon as the frost goes out in the spring and that will make about two weeks earlier. I consider a person can live cheaper here than any other place that I have been in. He can raise almost everything to eat, and if a man is willing to work he will do well here, of course we have advantages and disadvantages as in other countries but to take it on the whole, a man can get well off and be independent in a short time. I am a painter &c by trade and had never done any ploughing or farming in my life until I came to this country four years ago and I think I have done well.

(4)

in learning that art and getting things around me in the above time, I have materials on hand to build me new house next spring. I will give you one circumstance from a great number, a friend of mine came from England three years ago and scarcely had a cent left when they arrived here. He worked around awhile and then took up a homestead and now he has quite a farm with quite a number of cattle and horses around him, of course a man must work and restle a bit. I would say by my own experience it would be best for people that come here to take up homesteads and work on them and not work for other people.

(15)

any more than could be helped. I have
corresponded with my friends in England
and invited them to come out but do
not know if they will come or not. This is
a very healthy country never any sickness to
speak of. a deal more might be said.
upon this subject but space will not permit
hoping you will excuse these rambling stories
I will come to a close, if I can be of any
further service to you I will gladly do so

Your humble servant
Geo. G. Cooper

"Summit Shoe Factory"
Winnedona
Jan Dec 22-96
J. W. Hensback Esq-
Winnipeg

Dear Sir

I'm reply to

your circular sent me I beg to say I have
answered your questions to the best of my
knowledge - and as I take a deep interest
in everything which will help to develop
and fill up this great North West country
I gladly avail myself of the opportunity
offered to put some of my views before you

In the first place I had better give you
a short outline of my own experience in
Manitoba so that you will see that I speak of
what I know.

Being the son of a well-to-do tenant farmer on
the South-west of Scotland I came to Manitoba

in the Spring of 1887. being 25 years of age and newly married. I settled down on a homestead and preemption and for six years worked steadily and profitably breaking up my land and getting a herd of good grade cattle gathered around me. At the end of that time I got discontented and sold out my lot of stock and everything and moved to the State of Oregon. I realized from the sale of my land and stock something over \$8500.00 having started with less than \$1000.00.

After spending two years in Oregon I for family reasons went back to Scotland to take charge of the old farm where I was raised and with the intention of settling down there to stay. But somehow after having been for a few years out in this fine free country I found it overly anxious the grain to settle down there to make a living and at the end of two years I engaged with

Mrs. Gen. H. E. Wilkinson to come out again to Manitoba to manage his large stock and grain farm at Writtle which I successfully did for four years. Since I left there I have been settled near Winnipeg and have run a small Shedd Factory in connection with my farm and financially I have no reason to complain of the results.

During the time I was in Scotland I had many opportunities of talking with farmers and others about Manitoba and I found that they took a great interest in everything connected with this country and many of them expressed themselves as anxious to move if they could only make up their minds as to where to go and in fact I know I was the means of inducing quite a number to come to Canada. So far as I could find out there was no active work being done in that part of Scotland amongst the class of people which

I think are the best adapted for settling up this country - namely - the smaller tenant farmers and better class of farm servants and domestics - men and women who have been brought up to hard work and who thoroughly understand the care and management of stock and all branches of farming, and who are trained by necessity to make a shilling go as far as possible. Now I know for a fact that there are hundreds of such men and women all over the counties of Agr. South. Dumfries & Winton &c who would be only too glad to move on to the prairies of this great country if only the proper methods were adopted to bring before them the advantages of this country.

What to my mind is wanted is that a few good practical men who have been long enough in Manitoba and successful enough to show what can be done here, should be stationed in the

rural districts all over the old country, to come in close contact with the people to talk with them at their fairs and markets to tell them the plain facts about the country how we break up our land - build our houses how we house feed and care for our stock in winter - how we market our produce and the prices we obtain for it - the cost of living &c. All these things interest them greatly when told them by word of mouth by men whom they know and can trust and have had the actual experience.

The very same facts put before them in the form of pamphlets and other emigration literature they class on the same level as such medicine literature &c and give it a wide berth.

I understand of course that there are several Canadian agents stationed in the larger cities and towns but they very seldom leave their

offices and never come in close contact with the people until they have made up their minds where to go and are making enquiries about steamship fares out of it &c.

In conclusion I would say that so far as I am concerned I have no reason to complain of in coming to Manitoba - that I believe it the best country in the world for a poor man or a man with a limited amount of capital to come to - that he can make an easier and more comfortable living here than he can anywhere else on a farm - and that thousands of men who could never hope to be more than labourers in the old country could easily become owners of their own farms and be in comfortable circumstances in a few years in this country.

Wishing your association every success and hoping that through your endeavours this country may

in a few years become populated by an industrious thrifty and prosperous people.

I Am

Yours Truly

Wm Drummond

(11)

Barbery, Jan. 2nd. 1897.

H. W. Hembist Esq.
Winnipeg.

Dear Sir I herewith enclosed

list of questions as fully answered as my knowledge will permit (truthfully), and I am advised enclosing same to

(2)

Came against the Country
for themselves before morning
this families (if any) here.
As could like the Country and
either dislike it; but my
Candid opinion is that no
man who is willing to work
at anything that may turn
up may never be a day, I tell
in this Manitoba of ours.
At present we have a great-
many Irish here who are of
no use either to themselves
or the Country. Bums and
not needed here, nor will

(3)

they succeed in any Country.
I don't mean to say all will do
not succeed and Bums but that
are quite a number.

As for myself I know nothing of
Harming unless I came here. I
was in Rent. in the East-land
to borrow a little money to pay
Harming, and look for my Mother
what ever is worth doing is worth
doing well. I have not understood him
too much. I have been economical
and am therefore I have succeeded
pretty well. I am satisfied with what
I have done. W. H. English

Armistino Sask
Dec. 26th 1896

F. W. Neubach Esq.
Sir,

In reply to yours which I received last Thursday 24th inst. I have filled in part as I correctly could, as you will see being 50 miles from a market we cannot expect to make a fortune out of farming with a view of retiring on our earnings but I can safely say there are very few districts in this North West of ours where the settlers are as contented and comfortable, we are situated in a district of great fertility with abundance of hay, wood and water, and land that will grow almost any thing, not much troubled with summer frosts, but rough grasses and roots are always sure crop, small wild fruits, that is high and low bush cranberries, red cherries, blue ^{berries} Saskatoon, gooseberries, red & black currants, strawberries &c. are in great abundance.

For several years I worked at the bench being a joiner by trade the lowest wages I received being \$3. per day although I have made \$5 per day. Since 1887 I have worked steadily on my farm, at one time having over 60 head of cattle but hired help being hard to procure I cut down my stock to the present figures as given. I have not gone in for grain raising, but have stuck to the dairying which I can assure you pays well I value the milk from each cow at \$2.00 per annum milking 12 cows and doing most of the dairying in winter feeding my cows nothing but well made wild prairie hay, my stock consisted at first of good common cows from the Yorkshire breed, and I keep a thorough bred Durham Bull at the head of my herd, so that at 3 year old the steers will weigh from 1200 to 1500 live weight which invariably brings 3 1/2 cts per lb. this owing to the fact that you are under no expense except labor as we feed all wild hay with very little grain, so very remunerative.

We will probably start a creamery in our settlement this coming spring, which will induce a good many farmers who heretofore have done nothing but raise beef to go in for dairying.

In this Section of country there are a great number of homesteads yet to be taken up land that cannot be beaten for crop raising, and with the extension of the Manitoba North Western Railway which will give us an outlet which we have been promised ever since I have been in this country, this cannot fail to be a thickly populated, rich, and prosperous section of the Nor. West. I have seen quite a few leave here sick and tired waiting but after traveling for months in Canada and the States they finally

manage to come back here finally to stay, which speaks volumes for the quiet comfort of home life which we all enjoy.

Yours &c.

J. H. Reese

Anything I have overlooked that you would like to hear about give me the headers & I will try to fill up.

JHR

Wade Lamm

Reuben Dec 24. 96

J. W. Heubach Esq.

Dear Sir as to your request of a letter re Manitoba & this part of it in particular I must say that Manitoba has done well for me & mine and by my success have caused about 6 families to have settled here and there is not a single complaint among the whole lot. In our case there were two young men (who I knew were workers) came to me without one \$ and I gave them Cr. on 5578 worth of young stock for 10 years at 8 per

In four years they paid the principal & interest and had about 40 head left for themselves. And now they have 90 head. This has all happened within 6 years just past.

I have taken off 17 crops in Manitoba and never was troubled with frost. And I can say that the harvest of 1896 was the only partial failure I have ever had.

Yours faithfully

Will Champion

P.S. The reason I speak of the cattle deal is to show you the faith I have in Manitoba as regards stock.

J. W. Humbach Esq
Winnipeg
Man

Dear Sir

Please find enclosed the Blackfins
I received from you, filled as correctly
and as fully as you desired - I am Pleased
to know that an Immigration Association
has been formed - as it is a matter of great
importance I am only to glad to give
you any information that will be of any
use to the Association

My views on Immigration are not the
same as others. I don't approve of this
method of paying Agents large salaries
to lecture through (Out) the People are
suspicious thinking that we wish to
draw them to this Country from the sale
of their money. I have been to (Out) three
times since 1881 and have heard them
express themselves that way.

I approve of your system of getting all
the information you can from reliable
men those who have had experience in
farming both in grain growing and
stock raising

My experience tells me that there is no
better Country in the World than
Manitoba? It is a Country that any

Young Man Can make himself at home and be independent and comfortable by honest Industry.

I came to this Country and started with \$1000 I now own 860 acres of land I have now sufficient stock and implements to carry on farming as it should be. I built a new Brick house last year costing \$2000 I am comparatively speaking out of debt. The present times are much better for intending settlers than it was when I came.

We were a long way from Railways at that time but now the Dauphin County is opening up with its large tracts of fertile land with Railway facilities at hand any industrious man can make himself well off in a few years.

I would strongly advise the young ones of (Quebec) to come at once to Manitoba they are only making a living there here they can earn as much in the summer as they can earn in the whole year down there. being able to buy and pay for a farm for themselves all the time. You must excuse any mistakes I am getting up in years my hand is not as steady as when I was younger.

Yours Truly
Jos. Thornburn
